March 31, 2000

His Honour
The Honourable Peter M. Liba, C.M.
Lieutenant Governor of Manitoba

May It Please Your Honour:

I have the privilege of presenting, for the information of Your Honour, the Annual Report of the Canada/Manitoba Infrastructure Works program for the fiscal year ended March 31, 2000.

Respectfully submitted,

Jean Friesen

Jean Friesen
Minister of Intergovernmental Affairs

Manitoba

Deputy Minister of Intergovernmental Affairs

Legislative Building

Winnipeg, Manitoba, R3C 0V8
CANADA
General Office (204) 945-3787
Fax (204) 945-5255

March 31, 2000

Honourable Jean Friesen
Minister of Intergovernmental Affairs

My Dear Minister:

I have the honour to submit for your consideration the Annual Report on the Canada/Manitoba Infrastructure Works program for the fiscal year ended March 31, 2000.

The 1999/00 fiscal year marks the final year of the $245 million Infrastructure Works program. In its six years, the Infrastructure Works program played an immense role in the advancement of Manitoba's infrastructure, quality of life, and economy. The over 600 projects in total created an employment impact of approximately 4,400 jobs – on and off-site employment.

From Thompson to Teulon, the Infrastructure Works program touched all corners of Manitoba and changed communities for the better. Clean water, efficient sewer systems, reliable transportation routes, and responsible landfills and recycling programs are some of the important contributions the program has made in our province. In addition to these basic infrastructure improvements, the program made investments in strategic projects – the world-renowned arts and cultural institutions that put Manitoba on the global map, health and wellness centres, educational facilities – all of which have the capacity to provide wide-ranging economic benefits to the province and enrich our quality of life as a whole.

The big story of 1999 was the Pan American Games in Winnipeg, and several high profile projects were completed last year to assist in hosting this international event. During the Games, Manitobans were treated to world-class competition, sportsmanship and the legacy of numerous capital projects boosted by Infrastructure Works. For example, CanWest Global Park, which played home to the Games' exciting baseball events, was an instant hit in Manitoba. The $10.5 million park, assisted by $4.5 million from Infrastructure Works, draws scores of residents and visitors to the downtown Winnipeg location. A unique youth component of the project treats young people to behind-the-scenes action, access to the facility for amateur sporting events and the impact of positive role models.

The $1.64 million Festival Park Stage at The Forks is another Infrastructure Works project that continues to draw people together. Its inaugural use was the site of nightly festivities during the Games' two-week duration. Thousands of people gathered for world-class entertainment – including home-grown success stories Chantal Kreviazuk, McMaster & James, and Amanda Stott who thrilled the audience at "Manitoba Night," and Celtic sensations Great Big Sea who gave the "Canada Night" crowd a high energy show. And the legacy of Festival Park continues on, as the venue for other major concerts, holiday celebrations and cultural events.

. . ./2

Indeed, Infrastructure Works has impacted The Forks in many wonderful ways – contributing $970,000 to assist in the construction of the Manitoba Theatre for Young Peoples' new, $4.6 million theatre and offices at The Forks, and supporting the Manitoba Children's Museum in their creation of "WonderWorks – The Infrastructure Gallery – a hands-on exhibit that teaches youth and parents about the inner workings of community infrastructure. The Forks has truly developed into a cultural and artistic mecca for Manitobans and tourists – young and old alike.

The program has also had a particularly unique relationship with seniors – for example, several Brandon area seniors enjoy independence with some support services at Sokol Manor Supportive Housing. A vacant school was renovated into seniors' supportive housing units with $300,000 from Infrastructure Works. The new facility opened its doors in 1999. As well, the construction of a six-suite seniors' complex in Oak River meant local seniors could remain in their home community instead of uprooting to larger centres. These projects have made a real difference to many seniors – bringing independence, security, compassion and dignity to their lives.

While we close the chapter on the 1994 Program, we look ahead to the future – a new program with new opportunities. The February 28, 2000 federal budget announced funding of $2.68 billion for a new, six-year national Infrastructure Program. Manitoba, like other provinces, is finalizing a new agreement with the federal government and we expect to have the agreement signed this fall.

The primary focus of the new program is "green" infrastructure – projects that will protect and/or enhance the quality of our environment, such as water and wastewater systems, water management, solid waste management and recycling, and capital expenditures to retrofit or improve the energy efficiency of buildings and facilities owned by local governments.

The secondary focus is local transportation infrastructure, cultural and recreational infrastructure, infrastructure supporting tourism, rural and remote telecommunications, high-speed Internet access for local public institutions, and affordable housing. Our intent is to provide a program that serves the needs of all Manitobans – in particular those in areas where the infrastructure standards fall below the provincial norm. We look forward to strengthening Manitoba's diverse infrastructure and enhancing our overall quality of life.

Sincerely,

Marie Elliott
A/Deputy Minister

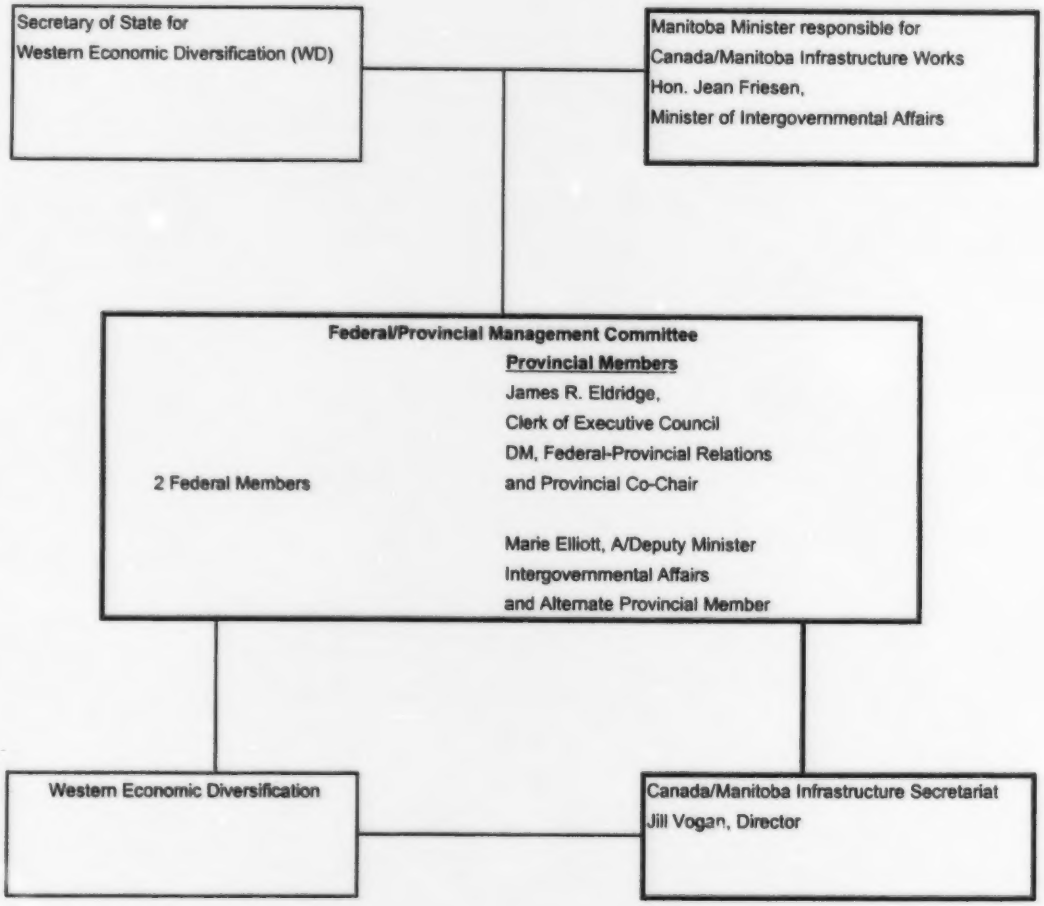
ORGANIZATION CHART

CANADA/MANITOBA INFRASTRUCTURE WORKS PROGRAM

(as of March 31, 2000)



PREFACE

Report Structure

The Annual Report is organized in accordance with the program's appropriation structure, which reflects the program's authorized votes approved by the Legislative Assembly. The Report includes information at the Main Appropriation level relating to the program's objectives, actual results achieved, financial performance and variances, and a six-year historical table of expenditures.

Appropriation 27-3 represents Manitoba's one-third contribution to the total program funds. Matching contributions are provided by the federal government and local governments or third party partners, including the private sector.

Mandate

Section 2.1 of the ***Canada/Manitoba Infrastructure Works*** Agreement indicates the purpose:

> "...is to enable Canada and the Province, in co-operation, where appropriate, with Contributors to undertake a program of investment in order to:
>
> - renew, enhance and create physical infrastructure which is instrumental in the provision of public services, notably in local communities; and
>
> - provide for timely and effective employment creation."

Program Overview

The ***Canada/Manitoba Infrastructure Works*** Agreement was signed on January 14, 1994 to provide for a three year, $204 million program of job creation and infrastructure enhancements throughout Manitoba. The federal government subsequently extended the program an additional two years to March 31, 1999. On March 21, 1997 the federal and Manitoba governments agreed to provide an additional $41 million top-up to the program for 1997/98, which brought the total ***Infrastructure Works*** investment in Manitoba up to $245 million. The federal/provincial program was cost-shared equally by the three funding partners.

Historical Overview of Program Expenditures
(Actual Dollars - $000's)

	Canada	Manitoba*	Local /Third Party	TOTAL contribution
1994/95	$18.7	$18.7	$17.5	$54.9
1995/96	$23.1	$24.4	$22.7	$70.2
1996/97	$9.4	$9.4	$9.2	$28.0
1997/98	$15.1	$15.1	$14.8	$45.0
1998/99	$10.5	$10.6	$10.3	$31.4
1999/00	$5.2	$5.2	$5.1	$15.5
TOTAL	**$82.0**	**$83.4**	**$79.6**	**$245.0**

* NOTE: For a few projects Manitoba provided additional funding above and beyond the matching federal/provincial Infrastructure agreement contribution.

Project proponents – primarily local governments – implemented approved projects, incurred 100 per cent of the costs, and were reimbursed two-thirds of the eligible costs by the federal and Manitoba governments.

As of the 1999/00 fiscal year-end, over 600 projects were announced, with an estimated employment impact of some 4,400 direct on-site and off-site jobs. Projects included priorities in a number of categories, such as water supply, sewer-related, roadworks, community facilities, waste disposal and recycling projects, and projects to further develop the information highway.

The ***Canada/Manitoba Infrastructure Works*** Agreement provided for consultative arrangements with local governments with respect to their projects. The consultative mechanisms included the establishment of the Provincial-Local Consultative Committee on Infrastructure, comprised of elected local government officials from rural Manitoba and the City of Winnipeg.

The Ministers responsible for the ***Canada/Manitoba Infrastructure Works*** program in Manitoba are Manitoba's Minister of Intergovernmental Affairs, Honourable Jean Friesen, and for the federal government, the Secretary of State for Western Economic Diversification.

The program is delivered by the provincial government through an office called the Canada/Manitoba Infrastructure Secretariat.

A list of announced projects, grouped under general categories of Strategic, City of Winnipeg, and Rural Funds is attached.

The Infrastructure Works program made a difference in many innovative ways – for example, $2.25 million assisted in the construction of a first-rate facility and exhibit space for the historic Hudson's Bay Company Collection.

THE CANADA/MANITOBA INFRASTRUCTURE WORKS AGREEMENT

Introduction

On January 14, 1994 Manitoba was among the first provinces to sign the federal-provincial ***Infrastructure Works*** agreement. The ***Canada/Manitoba Infrastructure Works*** agreement provided for a $204 million expenditure initially over three years and subsequently extended by the federal government to five years with the same level of funding – to be shared equally by the federal, provincial, and local governments or other third party partners. Manitoba, however, attempted to deliver the program within the original timeframe as much as possible to maximize immediate job creation and construction opportunities.

On March 21, 1997 the governments of Canada and Manitoba signed an extension to the original agreement, providing a top-up of an additional $41 million or $13.68 million by each partner for 1997/98. The investment into Manitoba's economy under the ***Canada/Manitoba Infrastructure Works*** program totalled $245 million.

In Manitoba, Ministers agreed to take a broad, flexible approach to ***Infrastructure Works*** improvements. As a result, traditional sewer, water, and road projects were supported, as well as a number of innovative and strategic projects contributing to overall economic growth and enhancing education, recreation, arts and cultural facilities in the province.

The Ministers responsible in Manitoba are Manitoba's Minister of Intergovernmental Affairs, Honourable Jean Friesen, and for the federal government, the Secretary of State for Western Economic Diversification.

Local Government Involvement

Manitoba's early involvement of local governments in the decision-making process became a model for other provinces.

Within a month of signing the January 1994 agreement, the Manitoba Government struck a special committee to assist in reviewing and approving project proposals.

The Provincial-Local Consultative Committee (PLCC) dealing with projects outside Winnipeg was a four member committee of elected officials from the Association of Manitoba Municipalities – an amalgamation of the former Union of Manitoba Municipalities (UMM) and Manitoba Association of Urban Municipalities (MAUM). Guided by the Agreement's general criteria, the committee adhered to a fair and equitable process in the review and recommendation of projects. Ministers responsible accepted and implemented all project recommendations by the PLCC.

Similarly, City of Winnipeg projects were also selected with assistance of the Mayor and City Council representatives.

Fair and Equitable Distribution of Funding

To ensure a fair allocation of funds among all communities and support for strategic projects benefiting the entire province, the federal and provincial Ministers responsible agreed to allocate 30% of the funding to projects outside the City of Winnipeg – the "Rural Fund", 30% to City of Winnipeg projects and 40% to "strategic" projects.

CANADA/MANITOBA INFRASTRUCTURE WORKS AGREEMENT, progress as at March 31, 2000

Infrastructure Works Fund	*Amount*	*Percentage*
Strategic	$ 97 m.	40%
City of Winnipeg	$ 74 m.	30%
Rural	$ 74 m.	30%
TOTAL	***$ 245 m.***	***100%***

Strategic projects provided immediate benefit not only to the surrounding area but also had the potential for a long-term effect on the provincial economy. From Manitoba's far north to Winnipeg's inner city, strategic projects touched all ranges of people and places. Examples of strategic projects included the construction of a sewer and watermain in Brochet, which delivered clean water and plumbing services in 1994, as well as new opportunities for the future of this remote northern community.

In November 1999, a supportive senior housing project opened its doors in Winnipeg's downtown area, with the help of $990,000 from ***Infrastructure Works***. The top four floors of the downtown YMCA were renovated into a 28 single-unit supportive housing complex. The $3.7 million Fred Douglas Heritage House offers seniors a greater range of affordable housing in the downtown area, and access to all recreational, fitness and shopping services provided by the YMCA and the Portage Place shopping centre.

Other strategic projects included such non-traditional forms of infrastructure as support to arts and cultural institutions, such as the construction of the Hudson's Bay Company Collection facility – a national heritage treasure donated to the province in 1994. This $2.25 million ***Infrastructure Works*** project, completed in 1999 at the Manitoba Museum of Man and Nature, is a permanent home for the over 10,000 priceless artifacts from Canada's historic fur trading period.

As well, ***Infrastructure Works*** worked towards the future, combining innovative technology with education. More than $10 million was invested in distance education initiatives connecting Manitoba communities. Interactive television and data transmission networks enable rural and remote Manitoba schools to connect, for the benefit of over 10,000 high school students. In addition, universities in Brandon and Winnipeg and community colleges in The Pas, Brandon and Winnipeg, used a combination of interactive video, data and multi-media technologies to provide students of all ages with a greater range of course options and access to leading-edge educational resources. A list of communities involved in the distance education projects is provided in Appendix "B".

Project Applications Far Exceeded Available Funding

Project submissions from local governments and other proponents outstripped expectations. The Canada/Manitoba Infrastructure Secretariat received over 800 applications requesting some $1 billion in support from the initial $204 million program.

Given the number of applications on file, the application process was not re-opened for the 1997-98 top-up funding. Ministers responded to the request by local governments to invest in municipal road infrastructure for the 1997-98 top-up.

Types of Projects

Federal and provincial governments across the country agreed the ***Infrastructure Works*** program should take a broad, flexible approach to infrastructure improvements. As a result, in Manitoba traditional sewer and water and road projects accounted for almost 75 per cent of the Infrastructure expenditures. Innovative or strategic projects to enhance services for education, the information highway, recreation, arts and culture accounted for approximately 25 per cent of the expenditures in Manitoba.

Traditional Infrastructure Projects

- Transportation – Roads, Streets and Bridges – Roads, streets and bridges around the province were enhanced or upgraded with a total of $83 million in ***Infrastructure Works*** funding. This includes $28 million from the 1997/98 top-up alone – $14 million each for rural roads and Winnipeg residential streets.

- Brookside Boulevard Four-Laning – The $7 million upgrade to Brookside Boulevard created a four-lane highway from Inkster north to the Perimeter Highway. This project, while generating 150 construction jobs, provides safer, easier access to the airport and major highways fanning out from Winnipeg, and continues to build Manitoba as a transportation hub.

- Rural Natural Gas Expansion – The communities of Oakville, Rosenort, LaBroquerie, St. Malo, Dufrost, Starbuck, Schanzenfeld, Elkhorn, Souris, Killarney, Boissevain, Hartney, Melita Deloraine, Gladstone, and Austin gained access to natural gas, with a $22 million injection from ***Infrastructure Works***. The rural gas expansion translated into long-term cost savings and enhanced competitiveness in attracting new industry, jobs and investment.

In total, approximately $83 million in Infrastructure Works funding was put to work renewing and rehabilitating roads and streets in rural Manitoba and Winnipeg.

- Springfield Water Distribution System – A contribution of $1.78 million from ***Infrastructure Works*** allowed the Rural Municipality of Springfield to develop their water supply and distribution system in 1997. The project provided Oakbank and Dugald with a long-term economic source of potable water, which will attract residential growth and new industry to the area.

- Winnipeg District Sewer Relief – A $20 million district sewer relief program in the City of Winnipeg was designed to reduce the risk of sewer back-up and flooding, and to reduce combined sewer overflows into the Red River. In total, the ***Infrastructure Works*** program invested $57 million into sewer and water-related projects.

Projects Supporting Northern and Remote Manitoba Communities

- Brochet Sewer and Watermain Construction – Prior to the fall of 1994, the residents of Brochet hauled their water up to a kilometre and used outdoor washrooms. That fall, the first taps were turned in this remote northern Manitoba community completing the $2.3 million project. With the assistance of $710,000 from ***Infrastructure Works***, the community has a plumbing system that meets Canada Housing Code standards complete with sinks, showers, bathtubs and energy efficient flush toilets.

- South Indian Lake Sewage Treatment Plant – A total of $415,000 was used to upgrade and expand the sewage treatment plant in 1995, allowing for greater commercial and residential growth and economic development.

- Northway Aviation's Airstrip and Seaplane Base at Biscuit Harbour – Increased tourism, economic opportunities and lower food costs are some of the many benefits that Northway Aviation's $1 million airstrip and seaplane base delivered to central and Northern Manitoba. The project, located near Pine Dock on the east side of Lake Winnipeg and completed in 1996, included the construction of an almost 4,000 ft. gravel airstrip, a limestone breakwater and 700 ft. of docks. The aviation facilities also improved emergency medical access for residents of Pine Dock, Matheson Island, as well as five remote northern communities.

- Town of The Pas Sewer Upgrade – Nearly $745,000 in ***Infrastructure Works*** funding helped to upgrade the sewage lagoon located in the northern Manitoba municipality of Consol. The project increased the system's capacity, reduced impact on the environment and offered greater potential for residential growth and economic development in The Pas and surrounding area.

Projects Supporting Health and Wellness

- The Wellness Institute at Seven Oaks Hospital – The state-of-the-art Wellness Institute was completed in the fall of 1996 with $3 million in funding from ***Infrastructure Works***. The 78,000 square foot facility, the first of its kind in Canada, offers a wide range of health and wellness activities – from cardiac rehabilitation and treatment of injured workers, to health promotion, and fitness/recreation activities. The innovative project created the equivalent of 36 full-time positions ranging from health professionals to support staff.

- Foundations for Health Research Facility Construction A $3 million contribution from ***Infrastructure Works*** helped to build a world-class health research centre at the Health Sciences Centre in Winnipeg. The four-storey, 100,000 square-foot centre brings together leading researchers in adult and pediatric medicine. When fully operational, the centre will create 150 to 200 new high technology jobs and attract $5 million to $10 million in additional research annually from sources outside Winnipeg. More than 570 jobs were created during the construction phase.

- Sokol Manor Supportive Housing – Nine Brandon area seniors enjoy the comforts of supportive housing, thanks to the opening of Sokol Manor – a supportive housing centre opened in 1999. The project received a $300,000 contribution from ***Infrastructure Works*** to assist in renovating a vacant school into 4,600 sq. ft. of individual living areas each with mobility access and a kitchen or serving space, as well as a communal dining and recreation area.

- Fred Douglas Supportive Housing – In November 1999, a supportive senior housing project opened its doors in Winnipeg, with the help of $990,000 from ***Infrastructure Works***. The top four floors of the downtown YMCA were renovated into a 28 single-unit supportive housing complex. The $3.7 million Fred Douglas Heritage House offers seniors a greater range of affordable housing in the downtown area, and access to all recreational, fitness and shopping services provided by the YMCA and the Portage Place shopping centre. Personal care and homemaking services are provided for residents, and on-site assistance is available 24 hours a day.

Brandon area seniors can maintain independence with support services at the Sokol Manor Supportive Housing complex. Hon. Jean Friesen took part in the official opening of the facility in 1999 along with Hon. Ron J. Duhamel, Secretary of State for Western Economic Diversification.

Projects Supporting Children and Youth

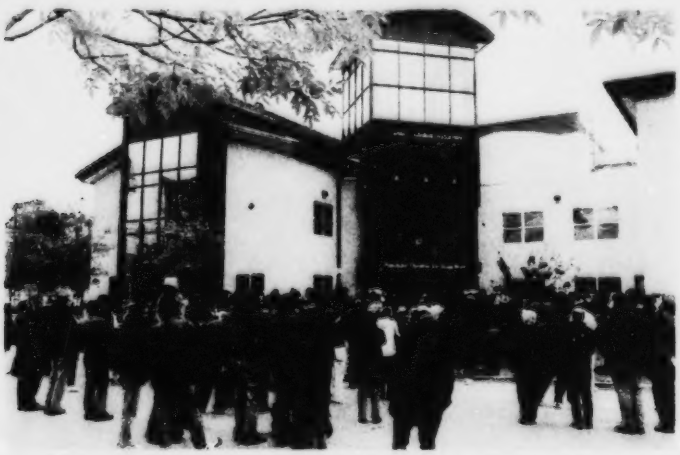
- Rossbrook House – This year-round neighbourhood activity centre located in Winnipeg's core area expanded with the help of $300,000 from ***Infrastructure Works***. Thousands of inner-city children and young adults have relied on the cultural, social, recreational and academic programs offered there by caring, compassionate staff. To meet an increased demand for services, Rossbrook House upgraded the existing facility and built an additional two-storey structure on adjacent property. The revamped centre officially opened in 1999.

- Camp Manitou – Camp Manitou, located on the Assiniboine River near Headingley, received $320,000 in funding to replace the camp's main assembly and recreation hall which collapsed under the weight of snow. The new fully-winterized hall, opened in 1998, enabled Camp Manitou to continue providing camping opportunities for urban and in particular, inner city children, as well as enabled the camp to hold social and family functions year-round, to help generate revenue during the off-season.

- Glenlawn Collegiate Community Athletics and Performing Arts Facility – A year and-a-half after a large section of Glenlawn Collegiate was destroyed by fire in 1994, a new athletics and performing arts facility was rebuilt, with $1.1 million from ***Infrastructure Works***. The new facility included a gymnasium, six new classrooms, choir and band rehearsal spaces and a 420-seat theatre.

- Manitoba Theatre for Young People – ***Infrastructure Works*** funding of $970,000 helped the Manitoba Theatre for Young People (MTYP) relocate to an innovative $4.6 million facility at The Forks. In addition to production and administration facilities, the unique building houses the MTYP main stage, touring programs, theatre school and theatre-in-education programs.

- WonderWorks - The Infrastructure Gallery – This Manitoba Children's Museum gallery gives children and their families a rare, hands-on opportunity to develop an appreciation of how infrastructure affects communities and the environment. With ***Infrastructure Works*** funding support of $40,000, interactive displays on waste and water distribution systems, road construction, power and heavy equipment show museum visitors how infrastructure works.

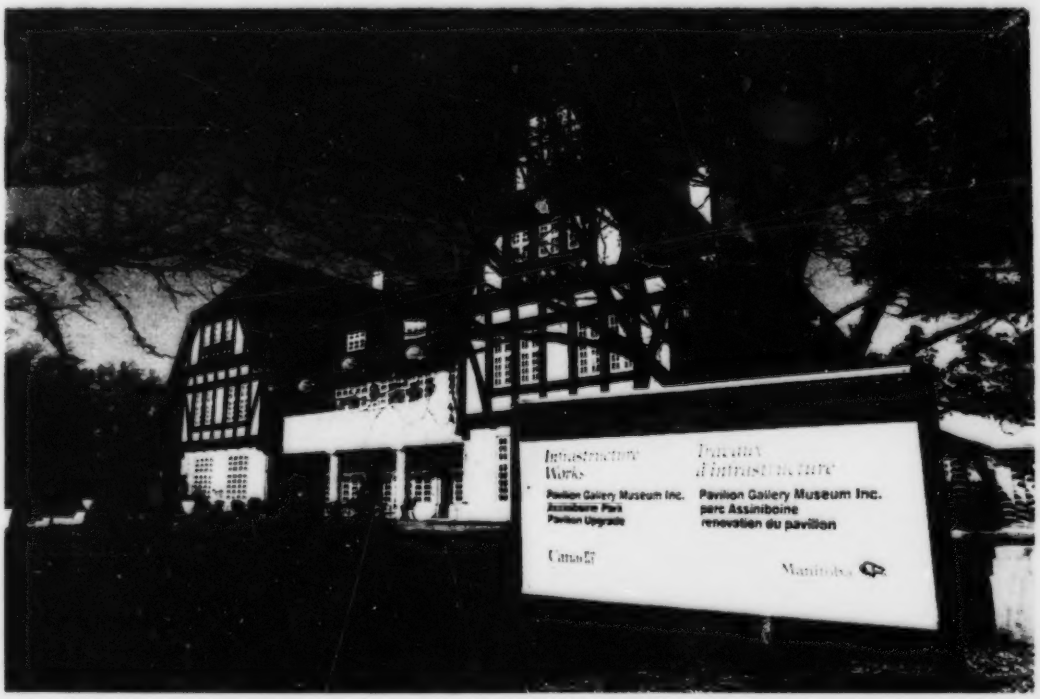


Manitoba Theatre for Young People relocated to a unique theatre and office complex at The Forks in 1999 – an exciting addition to the Forks' growing cultural scene.

Projects Supporting Recreation, Arts and Culture in Manitoba

- Hudson's Bay Company Collection Facility – Manitobans and visitors have the opportunity to witness the province's history first-hand at the Manitoba Museum of Man & Nature, thanks to $2.25 million in ***Infrastructure Works*** funding. The priceless HBC Collection, gifted to the Province of Manitoba by His Royal Highness the Prince of Wales in 1996, required a safe, permanent home for the over 10,000 precious artifacts from the fur trading period. The $5.4 million Collection Facility, completed in 1998, is climate-controlled to ensure the safety and integrity of the artifacts, and contains a permanent display gallery, research labs, staging areas and loading docks.

- Assiniboine Park Pavilion Upgrade – A $4.5 million project to rejuvenate the historic Assiniboine Park Pavilion received a $2.25 million ***Infrastructure Works*** contribution. The heritage building, constructed in 1930, was converted into a year-round facility that features a 150-seat restaurant and an art gallery showcasing works by world-renowned Manitoba artists Ivan Eyre, Walter J. Phillips and Clarence Tillenius. The renovations, completed in 1998, generated over 80 jobs during the construction phase, including direct on and off-site employment.



Winnipeg's landmark Pavilion at Assiniboine Park was completely renovated in 1998 to include a restaurant and art galleries featuring prominent Manitoba artists.

The Royal Winnipeg Ballet student residence, constructed in 1995, attracts students from around the world and builds a stronger base for tourism in Manitoba.

- Brandon Riverbank Enhancement - Pedestrian Bridge Construction – With $1.125 million in funding from ***Infrastructure Works***, a pedestrian bridge was constructed spanning the Assiniboine River in Brandon. The bridge links the downtown to the shore of the Assiniboine River, providing year-round, barrier-free access to the river.

- Royal Winnipeg Ballet Student Residence – ***Infrastructure Works*** invested $1.7 million towards the construction of the Royal Winnipeg Ballet's student residence in 1995. The facility attracts ballet students from around the world, and builds a stronger base for tourism in Manitoba. While generating some 60 construction jobs, the project also created seven full-time and seven part-time jobs at the renowned RWB.

- Winnipeg Art Gallery Studio Programs Building – The Winnipeg Art Gallery (WAG) Studio Programs Building was constructed adjacent to the main Gallery in 1995. Budding artists, ranging from children to seniors, have attended the creative workshops and programs developed and taught by local artists. ***Infrastructure Works*** provided $750,000 towards the building.

- Centro Caboto Centre – Italian Canadian Centre and Italian Trade Centre – The 27,000 square foot Italian Canadian Centre houses an auditorium, kitchen, restaurant, library, classrooms, games room, the Italian Vice-Consul office, administrative offices and an exhibition gallery. The complex is also home to an Italian Trade Centre that capitalizes on Winnipeg's strategic location, established industrial base and thriving Italian business community to increase trade links between Manitoba and the world. ***Infrastructure Works*** contributed a total of $1.7 million between the two projects.

- Treffpunkt – German Cultural Centre – The former Winnipeg Canoe Club, located on the banks of the Red River, was transformed into a Germanic cultural centre and sports/entertainment complex with $900,000 in ***Infrastructure Works*** funding.

Projects Supporting the 1999 Pan American Games

- CanWest Global Park – In addition to hosting baseball events at the Pan Am Games, Winnipeg gained a year-round venue for baseball, outdoor concerts, festivals and other community based activities with the help of $4.5 million from ***Infrastructure Works***. The $10.5 million multipurpose recreation and entertainment centre sits on 3.2 hectare of land situated north of The Forks. The park will also be the base for a recreational program for inner city youth. The total project generated over 200 jobs during the construction phase, including direct on-site and off-site employment.

- Festival Park – Festival Park at The Forks became the focal point for evening celebrations during the Pan Am Games, a site for entertainment and other festivities. Highlights included performances by Winnipeg chanteuse Chantal Kreviazuk during "Manitoba Night" and Celtic sensations Great Big Sea during "Canada Night." The project, assisted with $1.64 million from ***Infrastructure Works***, included a new covered stage and bandshell, arrival square and gateway and a pedestrian/cycling route. Since the Games, the park has been used for concerts, festivals and other high profile shows.

- Pan Am Pool – When the 1999 Pan American Games opened in Winnipeg, the Pan Am Pool was in top form, with a $1.509 million boost from ***Infrastructure Works***. A new addition was built and upgrades made to the pool's interior space, reception, lobby, concession, washroom, family change room and common areas. Alterations were made to improve accessibility for people with disabilities. Another $800,000 was also made available for parking lot improvements and landscaping to round out the project. In addition to preparing the pool for the Pan Am Games, the improvements have already helped attract other world-class swimming meets such as this summer's Sears I CAN SWIM National Swimming Championships – the final qualifier for the 2000 Olympic Summer Games in Sydney, Australia. The prestigious event drew over 400 swimmers from across North America and as far away as South Africa and Central America.

- East Side Eagles Football Club – A $1.4 million ***Infrastructure Works*** contribution was put to work upgrading this East Kildonan field, fencing and seating in preparation for hosting the Games' field hockey competitions. The regulation-size football/field hockey field is artificial turf with a cushion base made from approximately 32,000 recycled car tires. This surface allows the facility to be used over a longer period of the spring, summer and fall. The modern field is available to host Football Manitoba's coaching clinics, Field Hockey Manitoba activities, and serve as a provincial team training location for both sports. It is also readily available to amateur sport groups, community clubs and groups working with at-risk youth.

- Minnedosa Lake Dredging – A $1.2 million ***Infrastructure Works*** contribution towards an extensive sediment removal process increased the lake's capacity and improve the water quality to assist Minnedosa in hosting the rowing, canoeing and kayaking events for the Pan Am Games. The improvements will help the area attract other high profile watersports competitions and bring spin-off benefits to local residents and tourists.

Looking Ahead - New National Infrastructure Program

The February 28, 2000 Federal Budget announced funding of $2.65 billion over six years for a new national infrastructure program - $2.05 billion for Infrastructure over six years, starting in 2000-01, and $600 million for highways over four years, starting in 2002-03.

The provincial and federal governments are finalizing a joint agreement, with an agreement signing ceremony targeted for the fall of 2000.

The purpose of the new, six-year Canada/Manitoba Infrastructure Program Agreement is to improve Manitoba's urban, rural and northern municipal infrastructure. The program's primary investment focus is on green municipal infrastructure, with a secondary focus on investments in local transportation infrastructure, cultural and recreational infrastructure, infrastructure supporting tourism, rural and remote telecommunications, high-speed Internet access for local public institutions, and affordable housing.

This program will bring about new opportunities and will lever additional investments from other partners, including municipalities and the non-profit and private sectors.

The federal and provincial governments also look forward to working with representatives from Manitoba's communities. Local governments played a significant role in the former infrastructure program and their involvement in this new initiative is very much a priority.

Manitoba is committed to working with the federal government to provide the best possible program for all Manitobans, with particular attention to those areas where the infrastructure standard falls short of provincial norms.

More children and youth are able to take part in the cultural, social, recreational and academic programs offered at the newly expanded Rossbrook House located in Winnipeg's inner city.

CANADA/MANITOBA INFRASTRUCTURE WORKS PROGRAM

EXPENDITURE SUMMARY

For fiscal year ending March 31, 2000 with comparative figures for the previous fiscal year.

ELEMENT	**ACTUAL EXPENDITURE 1999/00 ($ '000's)**	ACTUAL 1998/99 ($ '000's)	INCREASE (DECREASE)	Expl. No.
Manitoba's gross expenditures under the Canada/Manitoba Infrastructure Works Agreement	**5,300.8**	10,803.8	(5,503.0)	1 & 2
Less: Federal Cost Recovery	**(112.6)**	(183.8)	71.2	3
Manitoba's Net Contribution to Approved Projects	**5,188.2**	**10,620.0**	**(5,431.8)**	

EXPLANATIONS:

1. The Infrastructure Works program concluded on March 31, 2000. Expenditures for the 1999/2000 fiscal year reflect final payments to the last remaining projects.

2. Actual expenditures include gross costs of provincially-administered projects.

3. Recovery from Government of Canada for 50% of costs related to provincially-administered projects. These recoveries are reported as revenue in the Public Accounts.

Schedule 2

CANADA/MANITOBA INFRASTRUCTURE WORKS PROGRAM

EXPENDITURE SUMMARY BY APPROPRIATION 27-3

	Actual Gross Expenditures 1999/00 ($ '000's)	Estimate 1999/00	Variance Over/(Under)	Expl. No.
Canada/Manitoba Infrastructure Works	**5,300.8**	6,127.1	(826.3)	1 & 2
TOTAL APPROPRIATIONS FOR CANADA/MANITOBA INFRASTRUCTURE WORKS	**5,300.8**	6,127.1	(826.3)	

EXPLANATIONS:

1. The Infrastructure Works Program concluded at the end of the 1999/2000 fiscal year. The 1999/2000 Printed Estimates of Expenditures took into account those projects that may not have been completed before the end of 1998/1999 fiscal year due to project financing, environmental approvals or adverse weather conditions. Actual expenditures reflect final payments to all remaining projects.

2. Actual expenditures include gross costs of provincially-administered projects.

APPENDICES

"A" Announced Projects by Fund

Lists of Announced Projects as of March 31, 2000 by Strategic Fund, City of Winnipeg Fund, and Rural or PLCC (Provincial-Local Consultative Committee) Fund are attached. This list does not include project amendments. For example, some local governments have requested that their funds be reprofiled to higher priority projects on file with the Canada/Manitoba Infrastructure Secretariat.

"B" Distance Education Projects

A list of communities involved in the Distance Education Projects is attached.

CANADA-MANITOBA INFRASTRUCTURE WORKS

PLCC or RURAL

The Canada/Manitoba Infrastructure Works Program ended on March 31, 2000.
The 1994 Agreement provided $204 million and on March 21, 1997 a $41 million Top-up Agreement was signed, bringing the total infrastructure investment in Manitoba to $245 million.

All approved RURAL projects were recommended by the Provincial/Local Consultative Committee (PLCC) on Infrastructure which included executive members from the former Manitoba Association of Urban Municipalities (MAUM) and the former Union of Manitoba Municipalities (UMM).

This table reflects project announcements as of the last announcement date, March 5, 1999. Amendments to projects are not reflected. For example, some local governments requested that their funds be reprofiled to higher priority infrastructure projects on file with the Canada-Manitoba Infrastructure Secretariat.

Projects with two or more announcement dates received "top-ups".

CANADA-MANITOBA INFRASTRUCTURE WORKS

PLCC or RURAL

The Canada/Manitoba Infrastructure Works Program ended on March 31, 2000.
The 1994 Agreement provided $204 million and on March 21, 1997 a $41 million Top-up Agreement was signed, bringing the total infrastructure investment in Manitoba to $245 million.

All approved RURAL projects were recommended by the Provincial/Local Consultative Committee (PLCC) on Infrastructure which included executive members from the former Manitoba Association of Urban Municipalities (MAUM) and the former Union of Manitoba Municipalities (UMM).

This table reflects project announcements as of the last announcement date, March 5, 1999. Amendments to projects are not reflected. For example, some local governments requested that their funds be reprofiled to higher priority infrastructure projects on file with the Canada-Manitoba Infrastructure Secretariat.

Projects with two or more announcement dates received "top-ups".

CANADA-MANITOBA INFRASTRUCTURE WORKS

PLCC or RURAL

The Canada/Manitoba Infrastructure Works Program ended on March 31, 2000.
The 1994 Agreement provided $204 million and on March 21, 1997 a $41 million Top-up Agreement was signed, bringing the total infrastructure investment in Manitoba to $245 million.

All approved RURAL projects were recommended by the Provincial/Local Consultative Committee (PLCC) on Infrastructure which included executive members from the former Manitoba Association of Urban Municipalities (MAUM) and the former Union of Manitoba Municipalities (UMM).

This table reflects project announcements as of the last announcement date, March 5, 1999. Amendments to projects are not reflected. For example, some local governments requested that their funds be reprofiled to higher priority infrastructure projects on file with the Canada-Manitoba Infrastructure Secretariat.

Projects with two or more announcement dates received "top-ups".

CANADA-MANITOBA INFRASTRUCTURE WORKS

PLCC or RURAL

The Canada/Manitoba Infrastructure Works Program ended on March 31, 2000.
The 1994 Agreement provided $204 million and on March 21, 1997 a $41 million Top-up Agreement was signed, bringing the total infrastructure investment in Manitoba to $245 million.

All approved RURAL projects were recommended by the Provincial/Local Consultative Committee (PLCC) on Infrastructure which included executive members from the former Manitoba Association of Urban Municipalities (MAUM) and the former Union of Manitoba Municipalities (UMM).

This table reflects project announcements as of the last announcement date, March 5, 1999. Amendments to projects are not reflected. For example, some local governments requested that their funds be reprofiled to higher priority infrastructure projects on file with the Canada-Manitoba Infrastructure Secretariat.

Projects with two or more announcement dates received "top-ups".

PROJ. No.	PROJECT PROPONENT	PROJECT DESCRIPTION	ANNOUNCED AMOUNT	DATE ANNOUNCED
243	V OF HAMIOTA	ROAD UPGRADE - PAVING	$140,000.00	May 20/94 & Mar 21/95

540	V OF TREHERNE	HALL UPGRADE	$115,000.00	May 20/94 & Mar 21/95
505	V OF WASKADA	SIDEWALKS / MANHOLES	$7,500.00	May 20/94
168	V OF WAWANESA	RESERVOIR/WATERMAIN	$80,000.00	Sept 21/94
232	V OF WINNIPEGOSIS	REPLACE WATER LINES	$134,000.00	Jun 10/94 & Mar 21/95

APPENDIX "B"

DISTANCE EDUCATION PROJECT - Kindergarten to Senior 4

The Manitoba Learning Network

*An $8 million **Infrastructure Works** project was designed to provide the infrastructure for educational interactive television and data transmission networks. It supported the cost-effective sharing of low-enrolment courses among these schools, for the benefit of over 10,000 high school students. The networks also provided enhanced educational opportunities for elementary school students, and enables access to community-based, life-long learning opportunities for learners of all ages throughout Manitoba.*

SCHOOL DIVISION	SCHOOL	COMMUNITY
CLUSTERS		
Agassiz School Division #13	Edward Schreyer School *Community Classroom with network connection*	Beausejour

NOTE: *Additional information is available in MERLIN's Annual Report.*

DISTANCE EDUCATION PROJECT - Post Secondary

*The $2.7 million **post secondary Infrastructure Works** project built on the existing strengths and systems of each of Manitoba's colleges and universities. A combination of interactive video, data and multi-media technologies were used to meet the needs of their target markets and ensure cost-effective program delivery. Post secondary institutions involved are:*

POST SECONDARY INSTITUTION	ESTIMATED COST
University of Manitoba, Winnipeg	$721,000
Collège universitaire de Saint-Boniface, Winnipeg	$119,600
Brandon University, Brandon	$130,000
University of Winnipeg, Winnipeg	$213,000
Keewatin Community College, The Pas	$1,181,000
Red River Community College, Winnipeg	$151,700
Assiniboine Community College, Brandon	$100,000

NOTE: *Additional information is available in MERLIN's Annual Report.*
